

Essay on first week's class

In first week's class we studied about humanities, humanities in native language, annotation, critical thinking, critical analysis, critical methods, github, hypotheses, history of humanities, why humanities necessary.

Humanities is the branch of knowledge such as philosophy, literature, art and understanding that are concerned with human thought, culture and society.

Humanities provide general knowledge, cognitive thinking, rational thinking and psychological skills. It also includes human condition, value and meaning. humanities is the study of how people process and document the human experience. Knowledge of these records of human experience gives us the opportunity to feel a sense of connection to those who have come before us as well as to our contemporaries.

Also humanities in my own language that is kurukh "मनवीकी एक ज्ञान के शाखा आहे, हिके दर्शन, साहित्य, कला आ दूसर अध्ययन सामिल अहे, जेन मनुष्य के सोच, संस्कृति आ समाज से जुड़ल अहे

"What is the difference between critical thinking and critical analysis and methods?

Critical thinking involves Reasoning , Evaluation, Problem-solving, and reflection. Critical thinking aims at the correct assessment of existing ideas. **Critical analysis** is the systematic approach which involves description, interpretation and evaluation. **Critical Methods** is a technique for analyzing, planning and scheduling large complex project.

History of humanities? Humanities originated from classical Greek term paideia, a general education course from the mid-5th century BCE which emphasized a broad and balanced education designed to develop the intellectual and moral capacities of individuals. This legacy has evolved through Roman and medieval traditions into the modern study of human culture and thought, continuing to reflect the ancient ideals of comprehensive education and personal development.

Why humanities necessary? They embody distinctive modes of producing knowledge and distinctive models of knowledge itself which emphasizes interpretation, contextual understanding, and qualitative analysis. They offer unique models for exploring human experience, ethical inquiry, and cultural perspectives, contributing to a more comprehensive and nuanced understanding of the world.

Annotation

Annotation is a practice used to add explanatory notes, comments, or critiques to a text or a piece of content. This process helps readers understand, interpret, and engage with the material more effectively.

Github

Github is an online platform where you can store, share and work together with others to write code

Hypothesis

Hypothesis adds a collaborative layer over any online content through the power of social annotation which makes online discussions more meaningful, productive and engaging.
